

SMITHSONIAN CONTRIBUTIONS TO BOTANY • NUMBER 70

A Bibliography of  
Plant Collectors in Bolivia

*V. A. Funk and Scott A. Mori*

SMITHSONIAN INSTITUTION PRESS

Washington, D.C.

1989

## A B S T R A C T

Funk, V. A., and Scott A. Mori. A Bibliography of Plant Collectors in Bolivia. *Smithsonian Contributions to Botany*, Number 70, 20 pages, 1 figure, 1989.—Despite substantial plant collecting in Bolivia, there is no general reference that summarizes information about collectors. Here, we list individuals known to have collected plants in Bolivia and for whom there is published information concerning their lives or their Bolivian collections. For each, we include biographical information, dates of Bolivian collections, herbaria containing the Bolivian specimens, and pertinent references to publications by the collector, or about the collector, the specimens, or the expedition. We also include a section of general references which pertain to several collectors; these are cross-referenced under the discussion of each collector. The type of information available from each general reference is briefly described.

OFFICIAL PUBLICATION DATE is handstamped in a limited number of initial copies and is recorded in the Institution's annual report, *Smithsonian Year*. SERIES COVER DESIGN: Leaf clearing from the katsura tree *Cercidiphyllum japonicum* Siebold & Zuccarini.

# A Bibliography of Plant Collectors in Bolivia

V. A. Funk and Scott A. Mori

## Introduction

Data associated with plant specimens may be useful to botanists, systematists, ecologists, biogeographers, and other biologists. Unfortunately, label information, especially for older material, is often cryptic. As a consequence, potentially valuable data may be lost. Sometimes this information may be reconstructed from publications about the lives and travels of the collectors. There is, however, no way of locating this information other than by *a priori* knowledge of where it was published, unless it is published in the comprehensive botanical taxonomic review by Stafleu and Cowan (1976–1988).

Here, we provide quick access to published information on the collectors of Bolivian plants, up through 1985. This is not intended to be a comprehensive discussion on all botanists who have ever collected in Bolivia. Rather it is a quick reference to available published data. Citations included here fall into two categories: general and specific. *General* references contain information about several collectors. *Specific* references discuss only one or two collectors. Citations are provided within an alphabetical list of individuals known to have collected in Bolivia, and about whom descriptive material has been published. Pertinent general references are listed within appropriate collector discussions, and then cited in full within a complete list of general references presented alphabetically by author. Additional references, if not included in the general or specific lists, are cited in full where they appear in the text.

The cryptogamic flora (especially the Bryophyta) of Bolivia is better known than that of any other neotropical country. This is primarily the result of the work of Theodor Herzog, C. Müller, E.G. Britton, Robert Williams, and F.J. Hermann.

---

V. A. Funk, Department of Botany, Smithsonian Institution, Washington, D.C. 20560. Scott A. Mori, Herbarium, New York Botanical Garden, Bronx, NY 10458.

Review Chairman: Laurence Skog, Smithsonian Institution. Reviewers: Timothy Plowman, Field Museum of Natural History; Harold Robinson, Smithsonian Institution.

The earliest student of Bolivian cryptogams was Müller. In his *Prodromus Bryologiae Boliviæ* (1897) Müller reported on the collections of Lorentz, Germain, Mandon, d'Orbigny, and Rusby. The *Prodromus* was the first comprehensive work on Bolivian bryophytes, although a year earlier E.G. Britton (1896, see under Rusby) had published an enumeration of the plants collected by H.H. Rusby in 1885 and 1886.

The works of Müller (1897) and E.G. Britton et al. (1896) were followed a few years later by treatments by Herzog and Williams. Herzog published a number of articles on the flora of Bolivia (1910 to 1945) that dealt specifically with his own extensive collections. Williams published two papers (1903, 1910) in which he enumerated his extensive Bolivian moss collections. The most recent work on the Bolivian cryptogamic flora was produced by F.J. Hermann (1976), who surveyed all of the literature from 1869 to 1974 and compiled a list of 1,222 species of mosses from Bolivia. The works of the five bryologists, Herzog, Müller, Britton, Williams, and Hermann, provide a relatively complete enumeration of Bolivian bryophytes.

Many individuals also collected fungi and lichens. Stevenson (1971) gives an international list of fungi collectors, the distribution of their specimens, and references to their collections. Hertel (1980) provides detailed information on international lichen collections.

The phanerogamic flora of Bolivia is not as well known and, although numerous collectors have visited Bolivia, no phanerogamic flora has been written. A checklist was prepared by R. C. Foster (1958) but, because of nomenclatural changes and much subsequent collecting, its usefulness has lessened. Nevertheless, it remains the best available local checklist for the phanerogamic flora.

Several individuals have either started floras of regions including Bolivia or have made contributions to one. Weddell began *Chloris Andina* in 1852. His original idea was to include the names, descriptions, and distributions of his own collections, and the alpine species collected by Humboldt in Colombia, Ecuador, and northern Peru, by Haenke, Meyen,

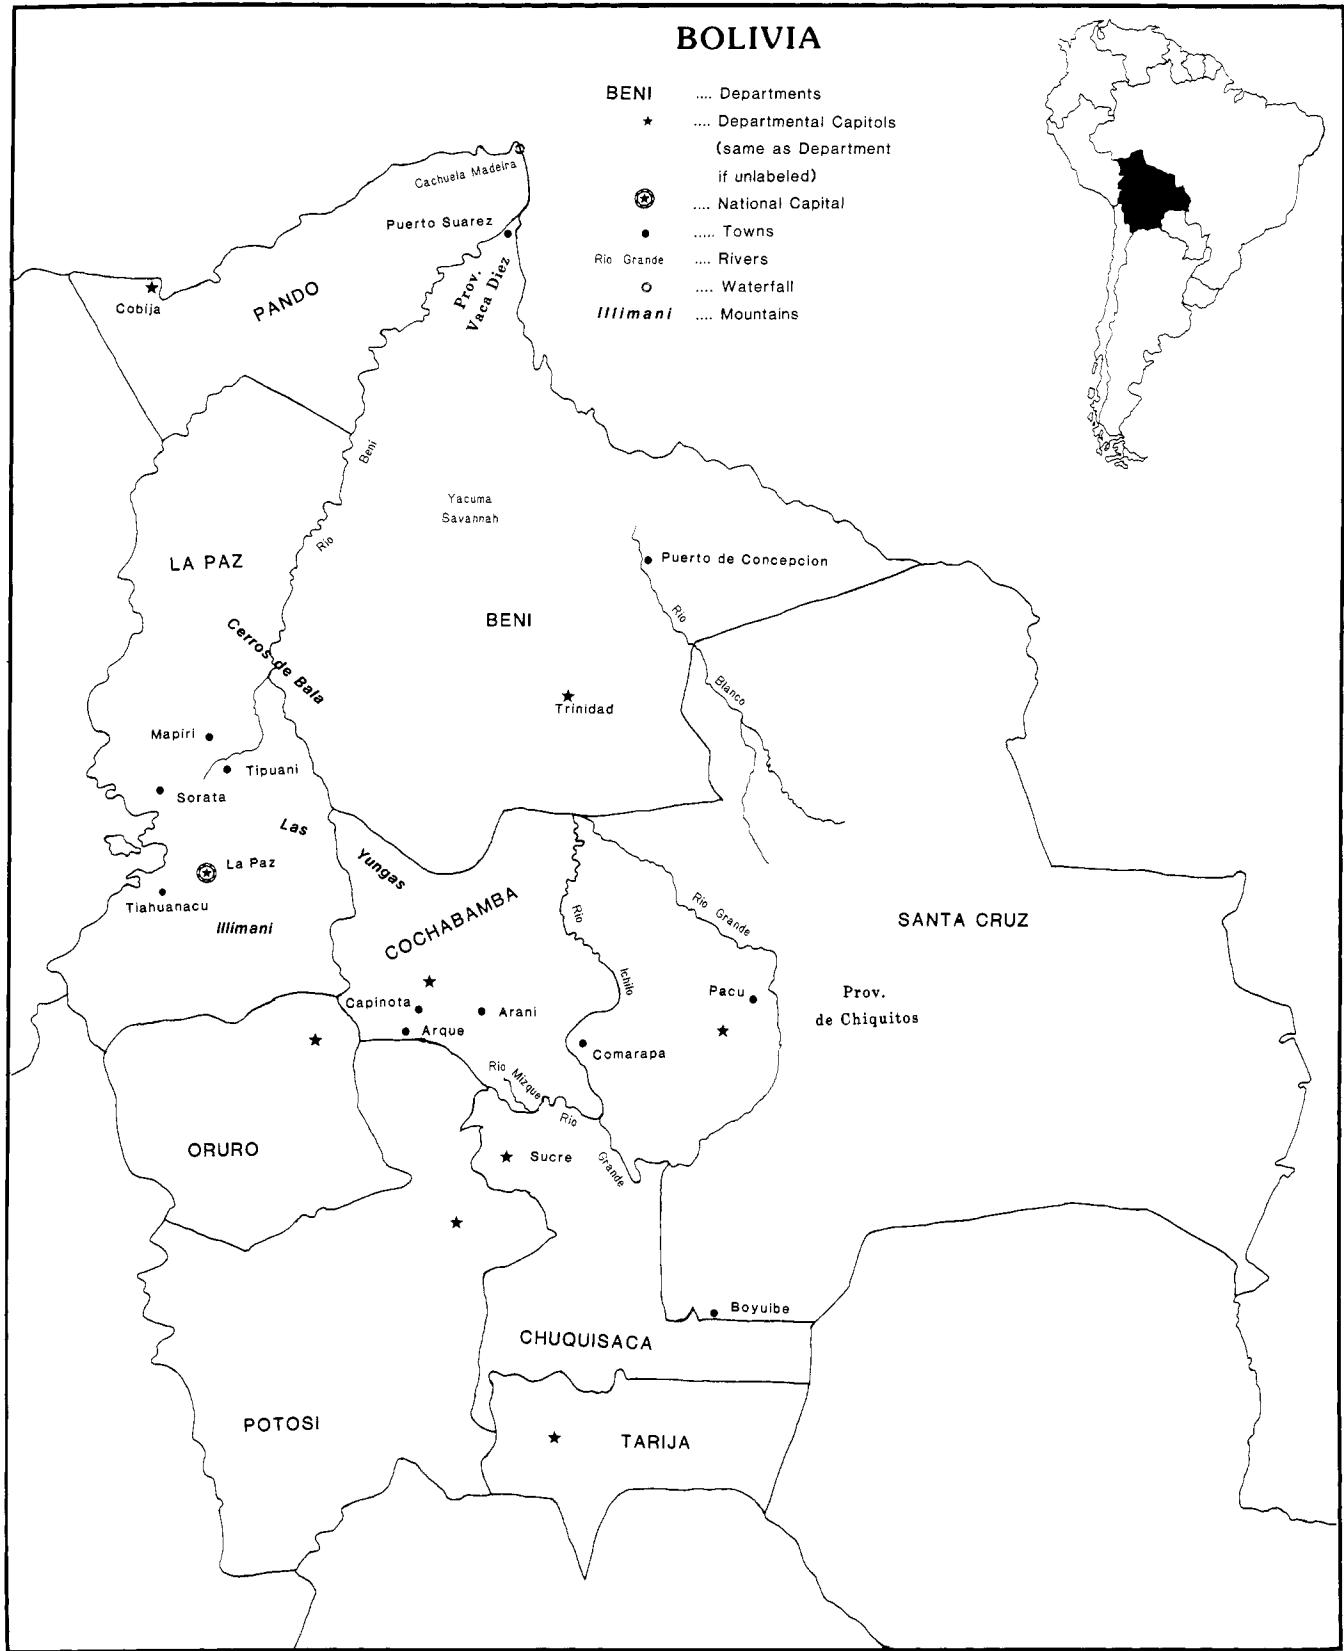

FIGURE 1.—Map of Bolivia, including regions of particular botanical collection.

d'Orbigny, Pentland, and Gay in Bolivia, and by Gay in Chile. The first volume treated the Asteraceae. The second volume, published in 1857, covered 42 additional taxa. The series was never completed because of personal problems faced by Weddell.

At the beginning of the 20th century, four independent projects pertaining to Bolivia were undertaken. Fries (1906–1909) published four papers that describe his Bolivian collections: the first covered the Asteraceae, the second the Malvales, the third 20 dicotyledonous families, and the fourth 21 additional dicotyledonous families, 15 monocotyledonous families, and the gymnosperms. Buchtien (1910) published a list that provides determinations for over 1,000 numbers from his Bolivian collections, including 200 pteridophytes. Identifications of the extensive collections of vascular plants by Herzog were published in parts with contributions by a variety of specialists (Herzog, 1913–1945; Koster, 1948, see under Herzog). Perkins (1912) provides identifications of the collections of Pflanz and Knoche as well as for some of those of Bang, Hauthal, and Bender; this publication included contributions by specialists, including Pilger on the Poaceae and Perkins on the Asteraceae.

The flora of Bolivia received virtually no study from the 1920s to 1946. At that time R.C. Foster organized what was intended to be a comprehensive flora. Experts were engaged to provide up-to-date treatments of their respective groups. Unfortunately, the project proceeded no further than a few revisions, such as that of the Iridaceae (Foster, 1946). Independent revisions for other groups of Bolivian plants include the Poaceae (Hitchcock, 1927), Rubiaceae (Standley, 1931), Bromeliaceae (Smith, 1969), *Vernonia* (Gleason, 1923), orchids (Schlechter, 1922), Labiateae (Epling, 1937), and *Stevia*, *Mikania*, and *Eupatorium* (Robinson, 1920, 1922, 1932). There are also many monographs on groups that include Bolivian species, but it is not within the scope of this paper to include all of those publications.

Two floras are available for subregions of Bolivia. Adolfo (1962, 1966) published identifications for his collections from the Valle de Cochabamba, and Peña de Flores (1901, 1944) listed his collections from eastern Bolivia.

Recently, the Missouri Botanical Garden has organized a "Proyecto Flora Boliviana" (Proyecto Flora Boliviana, Casilla 20206, La Paz) that is now underway. In conjunction with that project, James Solomon is actively collecting in Bolivia. In addition, since 1978 Stephan Beck (Herbario Nacional de Bolivia, Cajón Postal 20127, La Paz) has been involved in a collaborative project with the Universidad Mayor de San Andreas and the Universität Göttingen, Germany, to build the collections of the Herbario Nacional de Bolivia.

While many botanists have collected specimens in Bolivia, we have included here only those individuals for whom we have located some type of published information. Undoubtedly, we have overlooked collectors and information. We apologize for these omissions. James Solomon (Missouri

Botanical Garden) is now working on a comprehensive list of botanists that have collected in Bolivia. We recommend that all corrections and additions to this list be sent to him as well as to us.

**ACKNOWLEDGMENTS.**—This project was initiated in 1980. During ensuing years manuscript drafts have been read by many people. We thank all those who have contributed additions and corrections, including O. Almborn (LD), K. Barringer (NY), R. Barneby (NY), S. Beck (LPB), B. Boom (NY), W. R. Buck (NY), R. Cowan (US), J. L. Lutteyn (NY), T. Plowman (F), S. Renner (US), H. Robinson (US), J. Solomon (MO), and J. Wurdack (US). We also thank S. Hanel (US), B. Kahn (US), A. Leininger (US), L. Lynas (NY), G. McKee (US), J. McKiernan (US), J. Moller (P), and R. Schallert (US), for their technical help on the manuscript.

### Plant Collectors in Bolivia

This section includes information about individuals known to have collected plants in Bolivia and for whom published information is available. The arrangement is alphabetical by name of collector. To the extent that information is available, we provide for each collector (1) full name, (2) years of birth and death, (3) years in which the collector is known to have been in Bolivia, (4) the herbaria in which the collections are deposited, (5) citation of general references in which the collector is mentioned, and (6) specific references of articles written by or about the collector. In some cases, herbaria receiving complete specimen sets were specifically mentioned in one or more reference. We have indicated such mention by italicizing the appropriate herbarium abbreviation. Herbaria abbreviations follow Holmgren et al. (1981, Index Herbariorum, Part 1: The Herbaria of the World, edition 7, *Feddes Repertorium Specierum Novarum Regni Vegetabilis*, 106: vii + 1–452). We have inserted a question mark to indicate information that is missing, in doubt, or in disagreement between references. When death date is not indicated, collector is presumed to be alive.

**ADOLFO MARÍA, H. (Brother Adolpho; former name, A. Jiménez) (1893–1983?)**

Bolivia: From the 1950s until his death in Cochabamba; former professor at Colegio La Salle.

Herbaria: Herbario La Salle, US.

General References: Smith, 1969.

Specific References:

#### HITCHCOCK, ALBERT SPEAR (1865–1935)

Bolivia: 1923.

Herbaria: F, GH, HAC, K, KAS, MO, US.

General References: Barnhart, 1965; Hitchcock, 1927; Holmgren, 1981; Lanjouw and Stafleu, 1957; Stafleu and Cowan, 1976–1988; U.S. National Herbarium Collection List.

#### Specific References:

Hitchcock, A.S. 1925. A Botanical Trip to Ecuador, Peru and Bolivia. *Annual Report of the Regents, Smithsonian Institution*, 1924:335–351. A description of the 1923 trip to South America with an itinerary and photographs.

Hitchcock, A.S. 1925. Botanizing in Bolivia. *Scientific Monthly*, 20:163–175. A popular article on Hitchcock's Bolivian trip on which he traveled to some areas with Buchtien.

Hitchcock, A.S. 1927. The Grasses of Ecuador, Peru, and Bolivia. *Contributions from the United States Herbarium*, 24:291–556. Provides a brief itinerary of Hitchcock's trip as well as taxonomic treatment of his collections and others from these areas deposited at US. All of the specimens examined are listed by collector in the index, and a list of the localities within each country is provided.

#### HOLWAY, EDWARD WILLET DORLAND (1853–1923)

Bolivia: Sept., 1919–Oct., 1920; also in Chile, Peru, and Ecuador. Collected with his wife Mary Ellen Mortensen Holway.

Herbaria: B, MIN, MPPD, PUR, US, etc. (mostly fungi and voucher host plants).

General References: Barnhart, 1965; Epling, 1937; Holmgren, 1981; Lanjouw and Stafleu, 1957; Robinson, 1932; Stafleu and Cowan, 1976–1988; Stevenson, 1971.

#### Specific References:

Arthur, J.C. 1925. The Grass Rusts of South America; Based on the Holway Collections. *Proceedings of the American Philosophical Society*, 64:131–223. Contains a discussion of Holway's activities in the field followed with a detailed account of the species comprising the Holway collections.

Arthur, J.C. 1928. Professor Holway. *Mycologia*, 15:242–243. Obituary, in which are included dates of Holway's collecting trips to South America.

Blake, S.F. 1922. New South American Asteraceae

Collected by E.W.D. Holway. *Botanical Gazette*, 74:414–430. Descriptions of new species collected in Bolivia by Holway.

Dearness, J. 1946. E.W.D. Holway, 1853–1923: A Banker's Avocation. *Mycologia*, 38:231–239. A description of Holway's life and work; contains a review of the preparation and distribution of the Exsiccatae.

Jackson, H.S. 1926–1932. The Rusts of South America Based on the Holway Collections. *Mycologia*, 18[1926]:139–162; 19[1927]:51–63; 23[1931]:96–116, 332–364, 463–503; 24[1932]:62–186. These articles contain a detailed account of the species comprising the Holway collections. According to Stevenson (1971, see "General References") six pamphlets were issued with these fascicles, under the title *Reliquiae Holwayanae*, and were distributed from the herbarium of the late E.W.D. Holway, Department of Botany, University of Minnesota.

#### HUTCHISON, PAUL CLIFFORD (1924– )

Bolivia: On the fifth and sixth Goodspeed expeditions into Bolivia and other Andean countries, 1951–1958.

Herbaria: UC, US, USM.

General References: Holmgren, 1981; Lanjouw and Stafleu, 1957; Stafleu, 1967.

#### Specific References:

Goodspeed, T.H. 1961. *Plant Hunters in the Andes*. Berkeley: University of California Press. Hutchison traveled with the photographer W. H. Marshall. The field books from these two expeditions are at UC. Includes a very general map of the expeditions but only a few comments regarding the Bolivian portion of the trip.

#### ISERN Y BATLLÓ, JUAN (1825–?)

Bolivia: Between 1862 and 1865 he traveled many places in South America, including Bolivia.

Herbaria: F, MA.

General References: Chaudri, 1972.

#### Specific References:

Cuatrecasas, J. 1935. Plantae Isernianae. *Anales de la Universidad de Madrid (Ciencias)*, 3:206–265. Contains a brief discussion of Isern's travels on which he collected 8000 sheets. In Bolivia he visited principally Soroche, Tacora, La Paz, San Andres de Machachi, Tiahuanaco, and Guaqui.

#### JAFFUEL, P. FELIX (1874–1939)

Herbaria: CONC, GH, PC.

General References: Chaudri, 1972; Smith, 1969.

#### Specific References:

Theriot, I. 1929. Mousses de Bolivie recueillies par le P. Felix Jaffuel. *Revista Chilena Historia Natural*, 33:135–139, plates 6–7. Provides itinerary of Jaffuel's trip, a list of species collected, and localities.

## JAY, PIERRE (1870–1949)

Bolivia: La Paz and Sorata, 1893.

Herbaria: NY.

General References: Barnhart, 1965.

## Specific References:

Britton, E.G. 1896. An Enumeration of the Plants Collected by H.H. Rusby in Bolivia, 1885–1886, II. *Bulletin of the Torrey Botanical Club*, 23:471–499. Describes acquisition of Jay's collection by NY in 1893 and briefly discusses Jay's collection localities.

Burgess, E.S. 1898. *Bulletin of the Torrey Botanical Club*, 25:517–499. Mentions briefly Britton's report on Jay collections.

## JIMÉNEZ (see ADOLPHO)

## JULIO, BROTHER (dates unknown)

Bolivia: 1923–1933.

Herbaria: BM, C, GH, NY, US, W.

General References: Chaudri, 1972; Epling, 1937; Robinson, 1932; Smith, 1969; Smith and Schubert, 1945; Standley, 1931; U.S. National Herbarium Collection List.

## JUSSIEU, JOSEPH DE (1704–1779)

Bolivia: 1743 (or 1744)–1755, also including Peru and Ecuador.

Herbaria: C, P, P-JU.

General References: Barnhart, 1965; Chaudri, 1972; Coats, 1970; Pennell, 1945; Schlechter, 1922; Stafleu and Cowan, 1976–1988.

## KNOCHE, EDITH (dates unknown)

Bolivia: 1909.

Herbaria: B, H.

General References: Chaudri, 1972; Herzog, 1923.

## Specific References:

Perkins, J. 1912. Beiträge zur Flora von Bolivia. *Botanische Jahrbücher für Systematik*, 49:171–233. Identifies the collections of Knoche made in Bolivia in 1904 and 1909.

## KRACH, ERNST (1944–?)

Bolivia: 1979–1980.

Herbaria: LPB, M.

General References: Hertel, 1980.

## KRUOKOFF, BORIS ALEXANDER (1898–1984)

Herbaria: A, F, MICH, MO, NY, S, US, Y and others.

General References: Chaudri, 1972; Holmgren, 1981; Smith, 1969; Smith and Schubert, 1945; U.S. National Herbarium Collection List.

## Specific References:

## LAU, ALFRED B. (dates unknown)

Bolivia: Several trips in the 1960s and 1970s.

## Specific References:

Lau, A.B. 1971. Cactus Beside the Railroad Santa Cruz-Corumbá, Bolivia. *Cactus and Succulent Journal*, 43:187–191. Lau describes the areas where he collected on a train trip from Santa Cruz to Corumbá, Bolivia.

Lau, A.B. 1982, 1983. South American Cactus Log. *Cactus*

*and Succulent Journal*, 53[1982]:8–11, 74–76, 137–140; 54[1983]:33–36. Description of Lau's most recent trip to South America, in 1980. The pages listed describe the Bolivian parts of the trip.

#### LORENTZ, PAUL GÜNTHER (Pablo) (1835–1881)

Bolivia: 1870–1876, also visited Argentina and Uruguay (collected with Hieronymus).

Herbaria: B, CORD, GOET, K, M, NY, and others.

General References: Barnhart, 1965; Chaudri, 1972; Epling, 1937; Holmgren, 1981; Müller, 1897; Robinson, 1920, 1932; Sayre, 1975, 1977; Schlechter, 1922; Smith, 1969; Standley, 1931; Turrill, 1920; Urban, 1906.

#### Specific References:

Grisebach, A.H.R. 1874. *Plantae Lorentziana*e, Bearbeitung der ersten und zweiten Sammlung des Professor Lorentz zu Cordoba. Göttingen. Lists the total distribution of some Bolivian plants.

Müller, C. 1879, 1880. Prodromus bryologiae Argentiniacae, I and II. *Linnaea*, 42[1879]:217–460; 43[1880]: 341–486. All bryophyte specimens collected by Lorentz included in these and the following article. The identifications and localities of the specimens are listed.

Müller, C. 1897. Prodromus bryologiae Argentinicae atque regionum vicinarum, III. *Hedwigia*, 36:84–144. See also Müller, 1897, under "General References."

Stelzner, A. 1882. Zur Erinnerung an Dr. Paul Günther Lorentz. *Botanisches Centralblatt*, 9:450–468. This article has a detailed description of Lorentz's life and work and includes a bibliography.

Vervoort, F. 1972. Lorentz y Hieronymus: Primeros Botánicos Científicos de la Academia de Ciencias de Córdoba. *Boletín de Academia de Ciencias*, 49:63–70. General description of Lorentz's work; concentrates on work in Chile.

#### MAHUNKA, S. (dates unknown)

Bolivia: 1966.

Herbaria: M (at least some specimens).

General References: Hertel, 1980.

#### MANDON, GILBERT (1799–1866)

Bolivia: Six years, ca. 1848–1853 (or 1856–1861).

Herbaria: B, BM, F, FH, G, GOET, K, MO, P, S, W, and others.

General References: Barnhart, 1965; Candolle, 1880, Epling, 1937; Foster, 1946; Hemsley and Pearson, 1901; Hertel, 1980; Hitchcock, 1927; Holmgren, 1981; Maguire, 1958; Müller, 1897; Robinson, 1920, 1922, 1932; Sayre, 1975; Schlechter, 1922; Smith, 1969; Smith and Schubert, 1945; Stafleu and Cowan, 1976–1988; U.S. National Herbarium Collection List; Urban, 1906; Weddell, 1852, 1857; Wagenitz, 1982.

#### Specific References:

Buchenau, F. 1874. Über die von Mandon in Bolivia gesammelten Juncaceen. *Abhandlungen herausgegeben vom naturwissenschaftlichen Vereine zu Bremen*, 4:119–134. Lists the species of Juncaceae collected by Mandon including locality data and descriptions.

Cárdenas, M. 1953. Exploradores botánicos de Bolivia. *Revista de Agricultura* (Cochabamba), 8:20–42. Contains a discussion of localities but no itinerary. Cárdenas states that Mandon collected 1,800 numbers from Sorata and that a catalogue of the plants of Bolivia is at P. Because the specimens were used by a number of people for describing new species the holotypes are scattered.

Fournier, E. 1862–1864. Nouvelles collections de plantes à vendre. *Bulletin de la Société Botanique de France*, 9[1862]:190–191; 11[1864]:234–235. Brief note about Mandon's collections.

Mandon, M.G. 1865. Première liste des plantes des Andes Boliviennes recueillies et distribuées: Compositae, Malvaceae, Tiliaceae, Algae. *Bulletin de la Société Botanique de France*, 12:79–83.

Reichenbach, H.G. 1900. Orchideae Mandonianae. *Xenia Orchidacea*, 3:17–27. A treatment of the orchid collections of Mandon.

Schultz-Bipontinus, C.H. 1865–1866. *Enumeratio Cassiniacearum a cl. G. Mandon in Bolivia 1857–1861 lectarum. Linnaea*, 34:527–536. Schultz simply lists the Compositae collected by Mandon and gives no collection data.

Weddell, H.A. 1867. Notice sur M. G. Mandon. *Bulletin de la Société Botanique de France*, 14:10–12. Obituary in which a description of Mandon's travels is included.

#### MEXIA, YNES ENRIQUETTA JULIETTA (1870–1938)

Bolivia: 1935 (52 numbers in Bolivia).

Herbaria: F, GH, ILL, UC, US, U.

General References: Barnhart, 1965; Holmgren, 1981; Stafleu and Cowan, 1976–1985; U.S. National Herbarium Collection List; Vegter, 1976.

#### Specific References:

Bracelin, H.P. 1938. Ynes Mexia. *Madroño*, 4:273–275. Short biography that includes a list of collecting trips. Bracelin states that Mexia collected 300 numbers in the Andean Highlands.

Bracelin, N.F. 1982. *The Ynes Mexia Botanical Collections, an Oral History Conducted 1965 and 1967 by Annetta Carter*. Berkeley: Regional Oral History Office, The Bancroft Library, University of California. A general discussion of Mexia's collecting trips, life, and family.

## PEÑA DE FLORES, PEDRO RAFAEL (1822–1901)

Bolivia: Professor of natural history at the University at Santa Cruz, Bolivia.

Herbaria: Current location of collections unknown.

General References: Barnhart, 1965; Condarcá Morales, 1978.

## Specific References:

Cárdenas, M. 1969. *Disertaciones botánicas y amenidades biológicas*. Cochabamba: Los Amigos del Libro. Describes Peña de Flores' life and work and states that he was primarily interested in local floras.

Peña de Flores, P.R. 1901. *Flora Crucena*, 1st edition. Sucre, Bolivia: Pizarro. A flora in which the plants are listed by both common and scientific names.

Peña de Flores, P.R. 1944. *Flora Crucena*, 2nd edition. La Paz, Bolivia: Biblioteca Boliviana, Editorial del Estado. Contains additional information.

## PENTLAND, JOSEPH BARCLAY (1797–1873)

Bolivia: 1826–1828, 1836–1839, 1851.

Herbaria: K, OXF, P.

General References: Barnhart, 1965; Epling, 1937; Foster, 1946; Müller, 1897; Robinson, 1922; Standley, 1931; Steinberg, 1977; Vegter, 1976.

## Specific References:

Rémy, J. 1846, 1847. *Analecta Boliviana*, I and II. *Annales des Sciences Naturelles, Botanique*, series 3, 6[1846]:345–357; 8[1847]:224–240. These articles have descriptions of the plants collected and some discussion of the collecting areas.

## PFLANZ, KARL (Carl) (1872–1925)

Bolivia: High elevations, 1909.

Herbaria: B, F, US.

General References: Barnhart, 1965; Herzog, 1923; Hitchcock, 1927; Robinson, 1920; Smith, 1969; Standley, 1931; U.S. National Herbarium Collection List; Vegter, 1976.

## Specific References:

Anonymous. 1925. Karl Pflanz. *Notizblatt des königlichen Botanischen Gartens und Museums zu Berlin*, 9:406–

407. An obituary in which Pflanz's collecting is discussed.

Perkins, J. 1912. Beiträge zur Flora von Bolivia. *Botanische Jahrbücher für Systematik*, 49:171–233. Identifies the collections of Pflanz collected in Bolivia from 1907–1910.

Pflanz, K. 1923. Der bolivianische Gran Chaco: Beitrag zur Kenntnis der Kakteen-Gebiete im inneren Süd-Amerikas. *Zeitschrift für Sukkulantenkunde*, 1:2–6. Mostly a discussion of the vegetation of the areas in question.

Vaupel, F. 1923. Zwei neue Peireskien aus Bolivien. *Zeitschrift für Sukkulantenkunde*, 1:55–57. Species are described from Pflanz's collections with some discussion of the collecting areas.

Vaupel, F. 1923. *Echinocactus pflanzii* Vpl. spec. nov. *Zeitschrift für Sukkulantenkunde*, 1:83–84. The collecting trip is briefly described.

RATIBOR UND CORVEY, EGON VON VICTOR MORITZ KARL MARIA, PRINCE (also known as James West) (1886–1939)

Bolivia: Bolivia and other South American countries, 1935–1938.

Herbaria: CARL, GH, MO, NA, UC, US.

General References: Smith, 1969; Smith and Schubert, 1945 (as West).

## Specific References:

Anonymous. 1967. Incredible, Unforgettable James West, Plantsman (1886–1939). *Journal of the Californian Horticultural Society*, 28:180–181, 184–187, 196. Contains a biography that includes the dates of his collecting trips.

Goodspeed, T.H. 1961. *Plant Hunters in the Andes*. Berkeley: University of California Press. Ratibor traveled on the first Goodspeed expedition, 1935–1936, and returned again after the trip to Peru, Bolivia, and Argentina before returning to Germany in 1938. The account by Goodspeed gives a very general map and brief description of the expeditions.

RAUH, WERNER (1913– )

Herbaria: B, HEID, M, PRE, ZSS.

General References: Holmgren, 1981; Stafleu and Cowan, 1976–1988; Vegter, 1976; Zahra, 1970.

RAUSCH, W. (dates unknown)

Herbaria: ZSS.

General References: Holmgren, 1981; Zahra, 1970.

RITTER, F. (dates unknown)

Herbaria: ZSS.

General References: Zahlbrückner, 1897; Zahra, 1970.

ROSE, JOSEPH NELSON (1862–1928)

Bolivia: Several trips.

Herbaria: NY, US.

General References: Barnhart, 1965; Epling, 1937; Hertel, 1980; Sayre, 1975; Smith, 1969; U.S. National Herbarium Collection List.

#### RUSBY, HENRY HURD (1855-1940)

Bolivia: 1885-1887 and 1921-1922 (Bolivia and Brazil).

Herbaria: B, F, GH, K, MICH, NY, US, and others.

General References: Barnhart, 1965; Epling, 1937; Foster, 1946; Gleason, 1923; Hitchcock, 1927; Holmgren, 1981; Maguire, 1958; Müller, 1897; Paynter et al., 1975; Pennell, 1945; Prance, 1971; Robinson, 1920, 1922, 1932; Rusby, 1920; Sayre, 1975; Schlechter, 1922; Smith, 1969; Smith and Schubert, 1945; Stafleu and Cowan, 1976-1985; Standley, 1931; Urban, 1906; Vegter, 1976.
